## Summit Biosecurity System

Leading field data collection, mapping and GIS consultancy

# A 4D Cam picture is worth more than a thousand words

**With 4D Cam on your Motion Pen Tablet, there is no reason for mis-information to impact your profitability again!**

4D Cam images captured on Motion Pen Tablets are uniquely stamped with date, time and GPS position to provide you with a clear picture of what was actually observed on site.

4D Cam enables field staff to gain rapid support from experienced colleagues by emailing to identify weeds, pests or signs of disease images from the site.

**4D Cam images are used for:**

- Conducting Asset condition surveys
- Capturing images of animal or plant disease
- Identifying risks and potential hazards
- Identification of weeds and pests
- Recording evidence of non compliance
- Marking up drawings on site
- Sharing sketch plans from site visit
- Incident reports

**All Images are saved with Date, Time and Position\***

**Your Mobile workforce can save \$1,000's by preventing site revisits, wrong parts or equipment**

Acquiring Satellites

“ Whether you work in weed management, service delivery, construction, maintenance, data capture, conduct inspections or field audits.....

Being able to visually interpret images taken with 4D Cam on Motion Pen Tablets, which are hand marked, uniquely labelled and EXIF tagged with GPS coordinates, enables distributed groups to share knowledge accurately, which increases the productivity and confidence of your mobile workforce ”

**- Peter Terrett,**  
Managing Director  
RapidMap

Capture GPS referenced photos in the field

Install 4D Cam on ANY Tablet Computer or Handheld device with Microsoft Windows 8 or above Operating System

## Summit Biosecurity System

**WeedMap Pro Summit Biosecurity is a powerful mobile application with a configurable hosted information management system, enabling users to work concurrently across large regions to inspect, map, and record control activities for efficient and cost effective operations.**

- >> Makes reporting easy to ensure compliance with the Act and WAP requirements
- >> Map weeds or pests with interactive maps and associated Geo-located photos
- >> Fill out property inspection and control forms in the field
- >> See the full audit history of what has happened at each property
- >> Schedule inspection and treatment activities with email notification
- >> Synchronise and share activity data with your team via the cloud

**Complies with the NSW Biosecurity Act Weeds Metadata Standard, WAP and BIS reporting requirements.**

### Testimonial

We have been pleased with the advanced features of WeedMap Pro over normal GIS approaches, as this provides us with several efficiency gains for our organisation and the regional group being the Hunter Councils.

The professionalism and expertise of the Iconyx team in the implementation and training of the Upper Hunter Weeds Authority and other Hunter Councils demonstrates excellence in service delivery and we have been impressed by the follow up and technical support too.

**Doug Campbell**  
Works Coordinator  
Upper Hunter County Council

### Testimonial

"Have a look at WeedMap Pro as I have nothing but praise for the system as well as the back up and support from Iconyx.

I love all my weed maps.....and I am also using it for my rabbit program, internal Council works programs for oval and cemetery spraying, etc."

**- Kim Hignall,**  
Vegetation & Pest Management Coordinator,  
Lake Macquarie City Council

- >> Create activity, management and other reports quickly and easily
- >> Issue customised notices and save time
- >> Easily customise forms to your organisation's work flow
- >> Secure the privacy of your data
- >> Use on any Tablet, PC or Windows device
- >> 100% on/off-line availability
